

## ExporTech™

Export Assistance Program for Arizona Manufacturers

### LIVE WEBINAR: Wednesday, July 7th

If you are an Arizona manufacturer looking to grow your revenues and diversify your buyer base by exporting your products globally, this webinar will be the perfect venue for you to explore those possibilities.

This webinar is for Arizona manufacturers all along the export continuum: companies who have been proactively exporting and are looking to penetrate new, additional markets; companies who have been exporting reactively and are looking to develop a proactive and strategic approach to exporting; and companies who have never exported before.

**Join us for this informative webinar and you will learn about all of the export assistance programs available to you in Arizona and how they work hand-in-hand to help manufacturers grow globally:**

- ExporTech™: A NIST/MEP national program\*
- Arizona State Trade Expansion Program (AZSTEP) (an Arizona Commerce Authority Program)
- Arizona Trade Offices and Teams (an Arizona Commerce Authority Program)
- \* The ExporTech™ program is delivered by the Arizona MEP in collaboration with national program partners, including the U.S. Commercial Service, the National Institute of Standards and Technology (NIST), and Federal Express. ExporTech is a national program started by NIST. The program provides a structured process for these organizations to jointly deliver intensive support to high potential exporting companies ready to invest time and resources to jump start international growth.
