

# BUSINESS CONTINUITY PLANNING

## Can Your Company Survive a Disaster?

**Wednesday, June 3, 2020 (Updated Date!)**

If you are a typical manufacturing company, you are focused on keeping your customers and employees happy, managing profitability and cash flow, and chasing new business. But what about unplanned challenges? How about a broken water main that floods your shop; an electrical fire in the middle of the night; a cyber attack that destroys all your records?

Do you have a plan in place to keep your business running? Come to our workshop and learn:

- What is a Business Continuity Plan?
- Where do I start and who can help?
- How do I handle employees, customers, vendors, media?

Chances are you don't have a plan in place to keep your business running. Come to our workshop and learn:

- What are the critical functions to address
- What documentation to have in place
- Who should take action and how
- And much more!

You will take away an outline of a Business Continuity Plan, templates for collecting critical information, and a list of references and resources to help with your preparation...just in case.

**EVENT TIME**  
8:30am - 12:00pm
