

Challenge Results for July 1, 2019 Population Estimates

Resolved March 10, 2020

The City of Sierra Vista filed a challenge of the July 1, 2019 population estimate of 44,035 for the City and submitted documentation indicating that the group quarters data used for the original population estimate had an error. The Arizona Office of Economic Opportunity (OEO) reviewed the documentation in conjunction with the official July 1, 2019 estimate records. OEO accepted the new group quarters data and revised the July 1, 2019 population estimate for the City of Sierra Vista from 44,035 to 45,065. This revision also made it necessary to revise the July 1, 2019 population estimates for Cochise County and the State of Arizona. All revisions are listed below:

Results of Challenge to Vintage 2019 Population Estimates

	Original Population Estimate	Revised Population Estimate	Change in Population Estimate
City of Sierra Vista	44,035	45,065	1,030
Cochise County	129,778	130,808	1,030
State of Arizona	7,187,990	7,189,020	1,030

The July 1, 2019 population estimates for the State of Arizona, all counties, incorporated places, and unincorporated balance of counties are reposted to reflect revisions noted above.
