#### FOUNDATION

statewide, long-term economic development initiatives, including:

**ACA 2017 - 2022 Five Year Plan Completion:** FY22 marked the completion of the ACA's second strategic business plan with record-breaking results. Over five years, the ACA worked with companies that committed to creating 112,460 jobs for Arizonans, achieving 141% of our goal. These jobs have an average wage of \$62,817 – 115% of our goal. In addition, \$54.44 billion in capital will be invested in our state, an incredible 778% of our goal. In FY22, the last year of the plan, the ACA announced more jobs than ever in a single year, demonstrating the incredible momentum of our statewide economy.

**National Semiconductor Economic Roadmap (NSER):** In FY22, the ACA convened global industry leaders, academia, and federal and state government representatives into a national, precompetitive effort to advance U.S. competitiveness in the semiconductor industry. The roadmap will launch in September of 2022.

**Rural Arizona Broadband:** Under Governor Ducey's leadership, the Arizona Broadband Development Grant was created to expand broadband access to underserved Arizona communities. During FY22, the ACA was proud to award 20 recipients under the grant – funding projects that will catalyze economic development, support education, enhance public safety and more.
