Arizona - Israel Case Studies

CASE STUDY: NEW HEIGHTS IN THE WEST

- **Company:**
CP Technologies
- **Industry:**
Aerospace & Defense,
Manufacturing
- **Support programs:**
Relocation services and
workforce development

Miles of wide open space, sun rays abounding and innovation scaling—the perfect place for aerospace and defense manufacturing. That is exactly what attracted CP Technologies, the leading designer and manufacturer of rugged, custom computer hardware for the defense and industrial markets, to Arizona.

The Israel-based Aeronautics Ltd. subsidiary opened its newly constructed CP North American headquarters and manufacturing facility in Prescott, Arizona, noting the rural location, talent pool and business environment as the foundation for its success. Arizona’s pro-business environment means the cost of doing business is lower than the rest of the nation. And as the premier place to responsibly test, deploy and advance UAS innovations, CP Technologies and its UAS division, CP Aeronautics, fits right in.

Since its 2018 acquisition by Israeli-based Aeronautics Ltd., CP Technologies has expanded its offerings of rugged high-performance computer platforms, data links and LCD displays for the military, industry and commercial markets.

A PREMIER PARTNER

When looking to relocate its headquarters from California, CP Technologies connected with the Arizona Commerce Authority (ACA), accessing a suite of comprehensive services. The ACA provided seamless site selection support, workforce analysis and expert relocation transition assistance. Ultimately, the company selected Prescott, Arizona as its location of choice.

CP Technologies needed access to a highly skilled talent pipeline, which is fueled by Prescott’s Embry Riddle Aeronautical University and Yavapai College. Additionally, the region’s rapidly growing aerospace & defense industry coupled with its leadership in UAS development positioned Prescott as the ideal location to support the company’s manufacturing operations. The ACA was proud to partner with the company and help support its future growth and success in Arizona.

IMPACT

Arizona’s outstanding technology and business community—especially in Prescott—gives us the pro-innovation environment, high-quality talent and open airspace we need for our success.

MICHAEL McCORMACK
PRESIDENT & CEO OF CP TECHNOLOGIES

RELOCATION TO ARIZONA ALLOWED CP TECHNOLOGIES TO EXPAND OPERATIONS

- 50,000 square-foot facility
- 200 jobs over the next three years
- Expanded manufacturing capabilities
